## PROJECTS

### AN EFFICIENT MODEL FOR PREDICTING THE SHARE MARKET DATA USING DEEP LEARNING TECHNIQUES

**Nov 2022 - May 2023**

- A highly accurate and efficient deep learning model for predicting stock market data was developed.
- State-of-the-art deep learning techniques were leveraged to design and implement a robust system.
- The system is capable of forecasting future trends and fluctuations in the stock market.
- High accuracy and efficiency were achieved in predicting share market data.
- Future trends and fluctuations in the stock market can be forecasted by the implemented deep learning model.

### SREET LIGHT CONTOLLING SYSTEM

**Jan 2022 - Aug 2022**

- A smart lighting system project was initiated to design an energy-efficient and autonomously operated solution.
- The focus of the project is to create economical and affordable street lighting with smart capabilities.
- Energy-saving features are integrated into the design of the smart lighting system for streets.
- Autonomous operation is a key aspect of the project, enhancing efficiency and reducing manual intervention.
